BOBIS

A FOUR-WEEK BEGINNER WORKBOOK

My Child's First Tech Adventure

Small steps. Useful skills. Something to show.

AGES 7-10 / 20 SHORT SESSIONS

Parent guide + practice pages + answer guidance

bobis.com.ng | First edition - October 2026

Meet your machine

Paper + device

TODAY I CAN

Name a device and explain input and output.

A computer follows instructions and works with information. A laptop, desktop computer, tablet and smartphone are all kinds of computers. They can look different and still do similar jobs.

Input is information you put in, such as a tap or typed word. **Output** is what comes out, such as a picture on a screen or a sound.

TRY IT TOGETHER

01 With an adult, point to your device's screen and controls. Do not open its casing.

02 Type or tap with permission. Notice one thing the device shows or plays.

03 Say: "I put in ___. The device gave out ___."

CLASSIFY THESE ACTIONS

Write INPUT or OUTPUT beside each action.

Typing your name _____

Hearing a song _____

Tapping a button _____

Seeing a picture _____

- [ ] I can name one input and one output.

Adult note: If there is no device today, act out giving an instruction and receiving a reply. Return to the device task later.

Week 1 / Answer guidance

Use these as guidance, not as a script the child must memorise.

Session 01

Input: typing your name; tapping a button. Output: hearing a song; seeing a picture. Accept suitable examples from the actual device.

Session 02

There is no single drawing answer. Look for a controlled selection, mark or drag. Paper tracing is preparation; observe the real-device action too.

Session 03

Space; Backspace once; Enter in a note. CATX becomes CAT. The child's exact sentence can vary.

Session 04

Make a picture -> drawing app. Write a story -> writing app. Visit a web page -> web browser.

Session 05

Keep the drink away; ask an adult about the cable; ask for a turn. Accept equivalent careful choices.

WEEKLY CHECK

Ask the child to show, explain and try again. Give another short practice opportunity where needed.
